Many More Reds Defecting

CHICAGO, Nov. 30 (INS).

Allen Dulles, director of the ~~supersecret~~ Central Intelligence Agency, tonight disclosed there have been "many more high level defections" of Communist agents to the United States than have been made public.

Dulles said announcement of the defections "was being held back for the time being at least so we can delve more deeply into them" and extract knowledge of Communist intelligence apparatus.

Dulles made the disclosure at the University of Chicago law

alumni dinner. He made these points:

1. Russia spends 10 per cent of its military budget yearly in support of worldwide subversive activities.

2. The Red spy network has training schools in the Soviet Union which "graduate" thousands of professional agents.

3. International communism is "making progress in the Western Hemisphere" and Red agents have been active in the North African Nationalist riots. The recent London dock strikes and the disorders in oil-rich Iran.
